

There are three short courses about how to use the git version control tool. These are hosted on the edX platform. You will need to register with edX in order to access the short courses. To register go to <https://edge.edx.org/>.

If you do not already have an edX account linked to your UQ student account, you will need to create an account. Click on the link "[Create an Account](#)".

The screenshot shows a web browser window with the address bar displaying "https://edge.edx.org/login". The page features the "edX edge" logo at the top. Below the logo, there is a link "First time here? [Create an Account](#)." followed by a "Sign In" heading. The login form includes an "Email" field with the placeholder "username@domain.com" and a label "The email address you used to register with edX", and a "Password" field. A link "Need help logging in?" is positioned below the password field. There is a checkbox labeled "Remember me" and a blue "Sign in" button. Below these, a horizontal line separates the main login area from social login options, which include "or sign in with" followed by "Facebook" and "Google" buttons. At the bottom, there is a link "Use my institution/campus credentials".

LOGIN

[Trouble logging in?](#)

[Terms of use](#)

Once you are registered, you can login with your UQ student account. From the login page, you need to click on the link "[Use my institution/campus credentials](#)", which is circled in the image below.

This will take you to the same list of universities as when you registered.

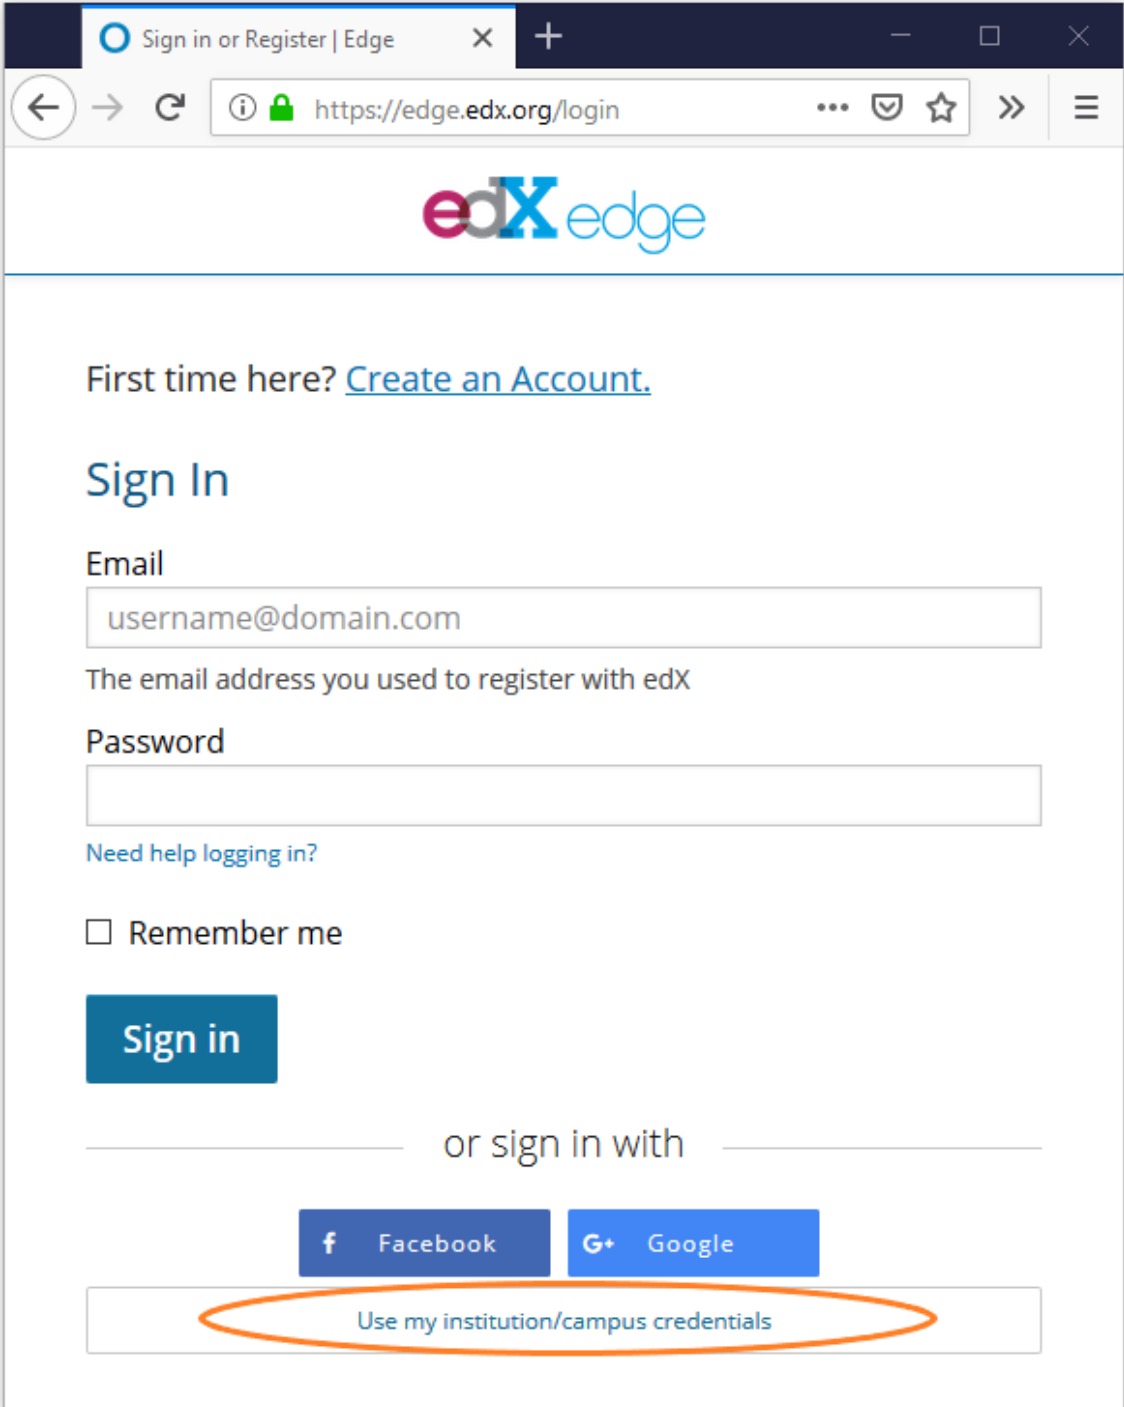

Click on the University of Queensland link and then enter your UQ username and password at the UQ Single Sign-On page. Once you have signed in, you will be taken to the list of courses in which you are enrolled.

You can enrol in the git short courses by clicking on the links below.

Course 1: [Introduction to Version Control with Git](#)

Course 2: [Version Control for Teams using Git](#)

Course 3: [Git Workflows for Large Teams](#)
