

Appendix A

Name: _____

Student ID _____

Appendix A introduces an example, concerning World War 2 capital ships. It involves the following relations:

- ShipModels(model, type, country, numGuns, bore, displacement)
- Ships(shipName, model, launched)
- Battles(battleName, date)
- Outcomes(shipName, battleName, result)

The relation ShipModels records the name of the model, the type('bb' for battleship or 'bc' for), the country that build the ship, the number of main guns, and their size (bore), and the displacement(weight, in tons). Relation Ships records the name of the ship, the model of the ship, and the year in which the ship was launched. Relation Battles gives the name and date of battles involving these ships, and relation Outcomes gives the result (sunk, damaged, ok) for each in each battle. The following shows sample instances for these relations.

Sample data for ShipModels
